

CavityComplete[®] Quality Assurance Program

Owens Corning, in collaboration with the Air Barrier Association of America (ABAA), has developed the industry's first Quality Assurance Program (QAP) for masonry veneer wall systems. The QAP helps ensure quality installation of the CavityComplete[®] system.

Q: *What are CavityComplete[®] Wall Systems?*

A: *Pre-specified, masonry veneer wall systems designed to produce a better wall and make the specification, design and installation process efficient*

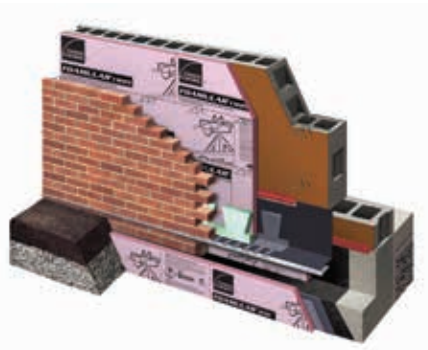

P: *Proven performance with components that are compatible, code compliant, documented and warrantied* to perform as intended*

CavityComplete[®] Wall System for Wood Stud with Masonry Veneer

The CavityComplete[®] Wood Stud Wall System excludes the masonry veneer, wood studs, interior gypsum board and exterior sheathing. A detailed list of the components is available at www.CavityComplete.com.

CavityComplete[®] Wall System for Concrete Masonry Unit (CMU) with Masonry Veneer

The CavityComplete[®] Concrete Masonry Unit (CMU) Wall System excludes the masonry veneer and concrete masonry units. A detailed list of the components is available at www.CavityComplete.com.

CavityComplete[®] Wall System for Steel Stud with Masonry Veneer

The CavityComplete[®] Wall System excludes the masonry veneer, steel studs and interior and exterior gypsum board. A detailed list of the components is available at www.CavityComplete.com.

Q: *What is the CavityComplete[®] ABAA QAP?*

A: *A service developed to help ensure quality installation of the CavityComplete[®] system, thereby eliminating costly callbacks and expenses associated with remediation for installation issues*

P: *Helps protect your business, your buildings and your occupants*

Air Barrier Association of America (ABAA)

The CavityComplete[®] ABAA QAP relies on the independent and third-party expertise of ABAA, which provides extensive technical knowledge and is up to date on current products and installation techniques. ABAA will issue a Certificate of Completion** documenting that your building project meets its stringent guidelines.

*See actual warranty for limitations, restrictions and requirements.

**The Certificate of Completion is an assurance that the job was specified and installed correctly; it is not insurance or a warranty for the work.

Q: *How does the CavityComplete[®] ABAA QAP work?*

A: *Using a two-step review process:*

Step 1: CavityComplete[®] team pre-build Construction Document Review to confirm your wall system is effectively designed and specified

Step 2: In-Field Audits performed by a team of third-party specialists to verify specified products, details and installation techniques have been implemented

P: *Proof and complete confidence that your building design and installation will perform as intended*

Q: *How does the CavityComplete[®] ABAA QAP help me?*

A: *Quality assurance performed by a team of specialists means:*

- Installation audits are easy and efficient, saving you time and money.
- All bids are from qualified, ABAA-accredited contractors and installed by ABAA-certified installers, making evaluations easier and consistent.
- Experts can document the sufficiency of design and report common and uncommon threats resulting from product installation or product substitution.

P: *Professional assurance that your project has been effectively specified, detailed and installed*

Q: *How do I get started?*

- A:**
- Contact us at 844-CAV-COMP
 - Include CavityComplete[®] ABAA QAP in your construction documents.

P: *Pre-project coordination can help with design details and specifications, so you receive the full benefits of the CavityComplete[®] ABAA QAP program.*
